Education

Universidad Rafael Landívar, B.S. in Computer Science and Systems Engineering 2020 – 2025
- Central Campus, Guatemala City

Colegio Capouilliez, High School Diploma in Sciences and Letters 2008 – 2019
- Guatemala City

Experience

IT Services Governance Analyst, Banrural – Guatemala City Mar 2026 – Present
- Design and establish API governance policies, ensuring scalability, security, and strict alignment with enterprise cloud architecture.
- Manage the lifecycle of integrations in hybrid ecosystems, standardizing CI/CD practices for automated and resilient service deployments.
- Supervise compliance with cybersecurity regulations and frameworks regarding the exposure and consumption of technological services.

Software Developer – Core Modernization, Banrural – Guatemala City Jun 2024 – Mar 2026
- Architected RESTful API facades for the secure and efficient decoupling of legacy systems into agile, microservice-oriented environments.
- Built Python-based data pipelines (ETLT) and integrated automated CI/CD flows, guaranteeing the continuous deployment of new core banking modules.

Integration Lead, Banrural – Guatemala City May 2022 – Jun 2024
- Architected and orchestrated cloud-native and hybrid integration solutions via Oracle Integration Cloud (OIC), connecting on-premise, PaaS, and SaaS ecosystems.
- Deployed data infrastructure on autonomous cloud databases (OCI ADW/ATP), optimizing information ingestion through automated ELT workflows.

Generative AI & Cloud Developer (Freelance / SaaS), Remote 2020 – Present
- Architecting custom SaaS solutions (e.g., CRM platforms) and automated workflows using Python, deliberately avoiding the limitations of off-the-shelf software.
- Provisioning cloud-native infrastructure using Infrastructure as Code (Terraform) and container orchestration (Docker/K3s), optimizing for agile, high-availability deployments.

Customer Service Representative, Walmart USA / Alorica – Guatemala City Oct 2019 – Jan 2020
- Provided agile problem resolution and Tier-1 technical support in fluent English across voice and chat channels.

Generative AI & Cloud Projects

Generative AI Mental Health Assistant Jul 2024 – Nov 2024
- Architected and deployed an AI-driven assistant on Azure/AWS, utilizing **RAG (Retrieval-Augmented Generation)** and vector databases (Pinecone/Milvus) to ground LLM responses in clinical data and prevent hallucinations.
- Integrated audio processing capabilities using Whisper and AWS Transcribe for accurate voice-to-text patient interactions, orchestrated via Python and LangChain.

AI-Driven Automated Marketing Agent 2025 – 2026
- Designed an automated intelligent agent using Python and n8n to orchestrate context-aware campaigns, processing multimedia assets via AWS Rekognition and generating content through LLMs.

Multi-Cloud Application Deployment 2024 – 2025
- Provisioned fault-tolerant and scalable infrastructure (**AWS Bedrock, Lambda, S3**, GCP Compute) using Terraform, applying strict IAM controls.
- Implemented end-to-end automation via CI/CD pipelines (Jenkins/GitHub Actions) for containerized deployments with comprehensive observability.

Skills Summary

Generative AI & Development: Python, LLMs, RAG, LangChain, LlamaIndex, Prompt Engineering, Pinecone, Milvus, Node.js.

Cloud & OCR/Audio Processing: AWS (Bedrock, Lambda, S3, Transcribe, Rekognition), Whisper, Azure, Google Cloud Platform (GCP), OCI.

DevOps & Infrastructure: Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Shift-Left Security integrations.

Certifications: OCI Architect Associate, OCI Generative AI Professional, Kubernetes CKAD, CompTIA Security+ (SY0-701).

Languages: Spanish (Native), English (B2 - Upper Intermediate).
